SEQIS

Remote Testing Services

Ensure Outcome

RTS

Remote Testing Services
Ensure Outcome

- Are you struggling to manage the necessary testing tasks with your core team?

- Is there a lack of specific test know-how, personnel resources, the possibility or willingness to take on test tasks?

- Or do you need an external professional viewpoint for quality assurance and to ensure common testing standards?

- Do you want to avoid investing in own testing infrastructure or just strengthen your team temporarily?

We can help you!

Since over 20 years, we have been successfully providing our customers with test-specific expertise. You too can benefit from our Remote Testing Services!

100% ready
SEQIS RTS is established and ready for your tasks.

100% professional
The experts are certified and field-proven.

100% prepared
SEQIS has methods for rapid alignment with your processes.

Push your project with the following services:

- **Test case creation:** Whatever you give us as a test base: Requirements documents, results of previous test runs, bug reports, access to applications,… or a simple talk through of your application together. With this starting points, we are able to create the optimal test cases for you.

- **Test execution:** Whether manual or automated: We run your tests, document them based on standards and help you manage defects.

- **Test Automation:** Do you have no or too few automated test cases? We create, maintain and execute automated tests for you. Gladly with your test automation framework - or we provide ours.

- **Test data:** We analyse, create and maintain your test data.

- **Test environments, monitoring, reporting:** We also manage your test environments, integrate your system monitoring in our tests, take care of reporting, help with your go-live decisions and much more.
